

AvePoint® DocAve® Report Center

One Dashboard for Comprehensive Platform Intelligence

DocAve Report Center is the industry's most powerful and flexible SharePoint intelligence toolkit, providing single-pane access to a wide variety of mission-critical analytics regarding platform infrastructure, health, and activity. With DocAve Report Center, administrators gain a comprehensive understanding of their platform's topology, usage, and performance trends, and can generate flexible, fully customisable reports based on this critical intelligence. Piloted via a single, easy-to-use interface, DocAve Report Center is the only solution administrators need to obtain the knowledge vital for delivering optimal platform performance and successful strategic planning.

- Real-Time Platform Monitoring**
 Track, record and report upon virtually every aspect of platform architecture, activity, and process. Leverage customisable graphical displays to analyse trending, and establish customisable alerts and notifications to proactively respond to issues that might affect platform performance.
- Comprehensive Infrastructure Reporting**
 Track, record, and report upon all aspects of the platform's architecture and topology. Generate real-time, side-by-side difference reports at any level to discern outliers, and monitor load times of SharePoint sites and other elements to track platform performance.
- SharePoint Usage Analysis**
 Leverage live platform content and audit data to track and graphically represent platform usage, user/search activity, and permissions-regimes. Track storage per user, and gather critical statistics regarding your company's content producers and consumers.
- DocAve Processes and Status Reporting**
 Monitor and analyse all DocAve infrastructure management processes, including disk space usage, job performance, and agent/server/topology. Fully customisable alerts deliver real-time notification on virtually all DocAve processes.

*As with all AvePoint software, the DocAve Software Platform leverages only fully supported Microsoft methodologies and APIs.

Key Features and Benefits

▪ Real-Time Platform Monitoring

Track SharePoint index status, network bandwidth usage, CPU and memory consumption, and more-all from a single, customisable interface. Trend this data over time to discern optimal maintenance schedules. Leverage customisable alerts based on disk space and CPU usage to proactively address potential performance issues.

▪ Comprehensive Infrastructure Reporting

Trend storage usage for each content database, web application, and site collection, and run real-time difference reports at any level to discern outliers. Monitor load times of SharePoint sites and other elements to track platform performance.

▪ SharePoint Usage and Analyses

Leverage audit data to track and graphically represent platform usage, user activity, and vital analytics – including disk space usage per user as well as most frequently accessed content and search terms. Gain valuable insight into inherited permissions regimes, which terms are being searched for, and analyse trending for end users production and consumption of content.

▪ DocAve Processes and Status Reporting

Monitor and analyse all DocAve infrastructure management processes, including disk space usage, job performance, and agent/server topology. Fully customisable alerts ensure administrators are notified of interruptions in real-time.

Supported Environments

Microsoft SharePoint Server 2010

Microsoft SharePoint Foundation

Microsoft Office SharePoint Server 2007

Windows SharePoint Services v3
